

Toolbox.

THE NORDA™ TOOLBOX IS THE FIRST DUFFEL BAG EVER MADE ENTIRELY OF BIO-DYNEEMA®, THE WORLD'S STRONGEST AND LIGHTEST FIBER™. DESIGNED TO CONTAIN THE FULL RANGE OF OUR FOOTWEAR SYSTEM WHILE STILL HAVING AMPLE SPACE FOR OTHER EQUIPMENT AND MISCELLANEA, THE NORDA™ TOOLBOX WILL CONTAIN AND SUPPORT ANYTHING YOUR MIND CAN CONJURE. THE INTERIOR FEATURES A ROBUST COMBINATION OF BOTH ELASTICIZED AND ZIPPERED MESH COMPARTMENTS AS WELL AS A STEALTH BLACK BIO-DYNEEMA® STOW BAG FOR ADDITIONAL ORGANIZATIONAL POTENTIAL.

DURABLE AND FUNCTIONAL, CRAFTED BY TRAIL RUNNERS FOR TRAIL RUNNERS. USE WITHOUT CAUTION.

A

B

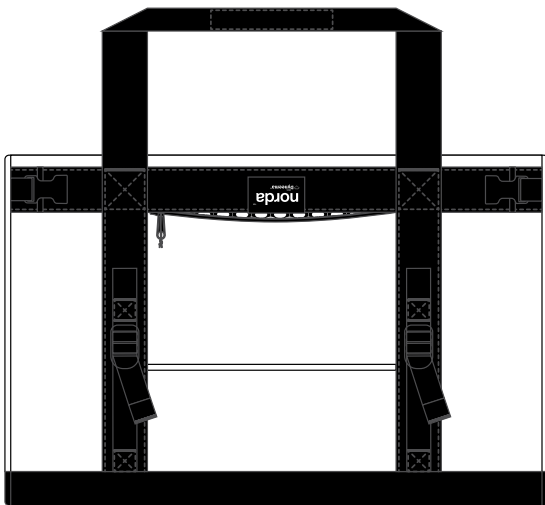

C

The **norda™** Toolbox comes with 3 elements.

A - The Main Duffel Bag.

B - The Stow bag.

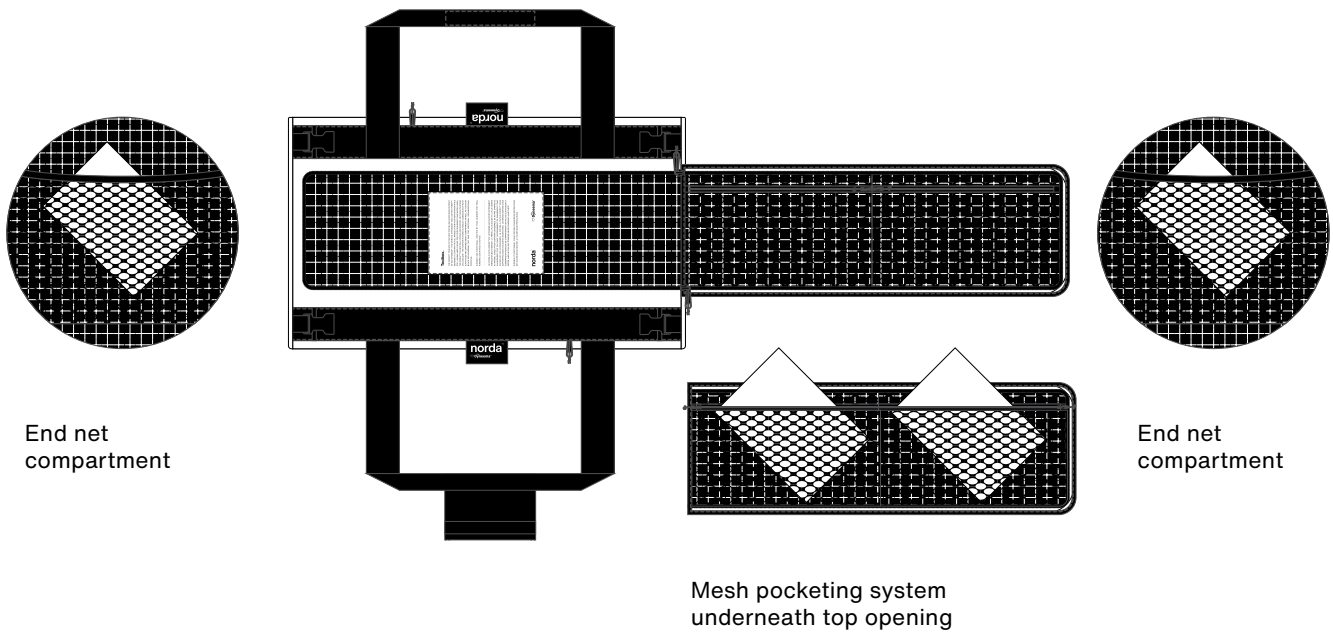

C - The Backpack Straps.

The duffel bag can be carried like a traditional duffel bag using the two main straps.

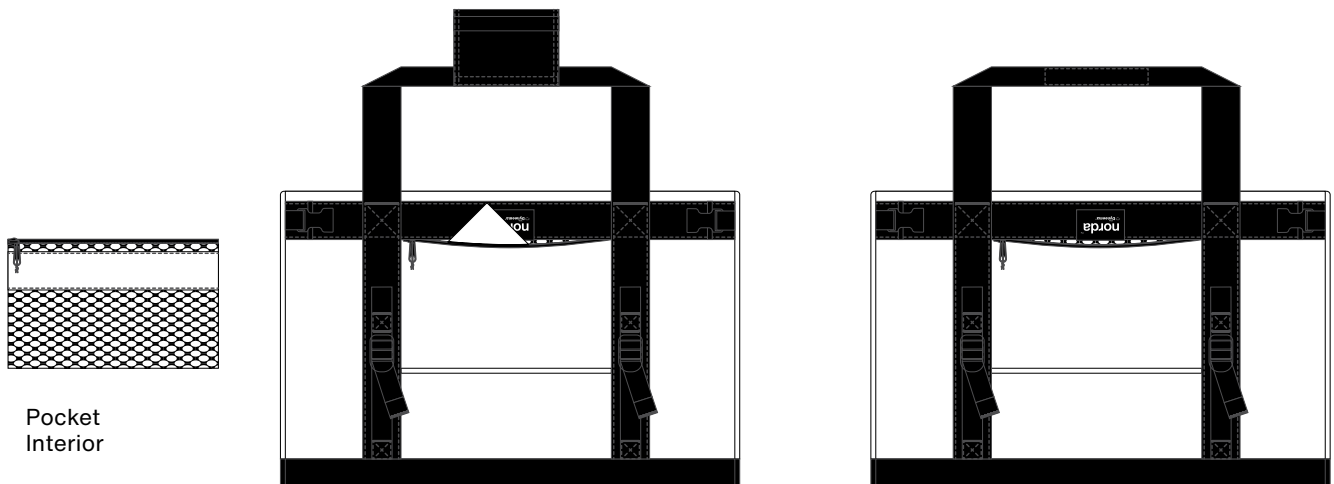

The duffel bag can be carried like a backpack once the two backpack straps are clipped to the duffel bag.

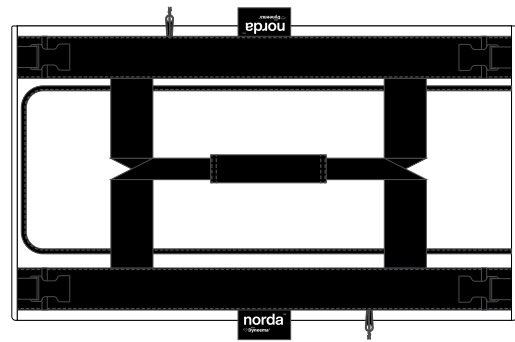

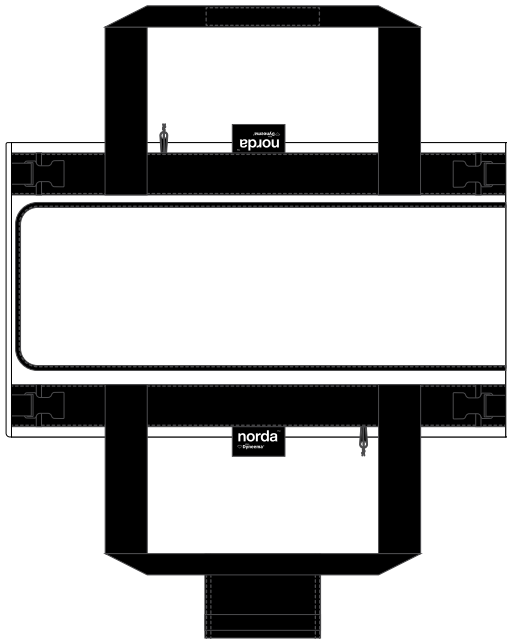

When the **norda™ Toolbox** is zipped completely open from the top, it reveals the interior and a pocketing system underneath the padded top opening.

Underneath the padded top opening is a mesh pocketing system featuring two segregated and zippered cargo areas side by side. These spaces allow for documents and objects to be stored securely.

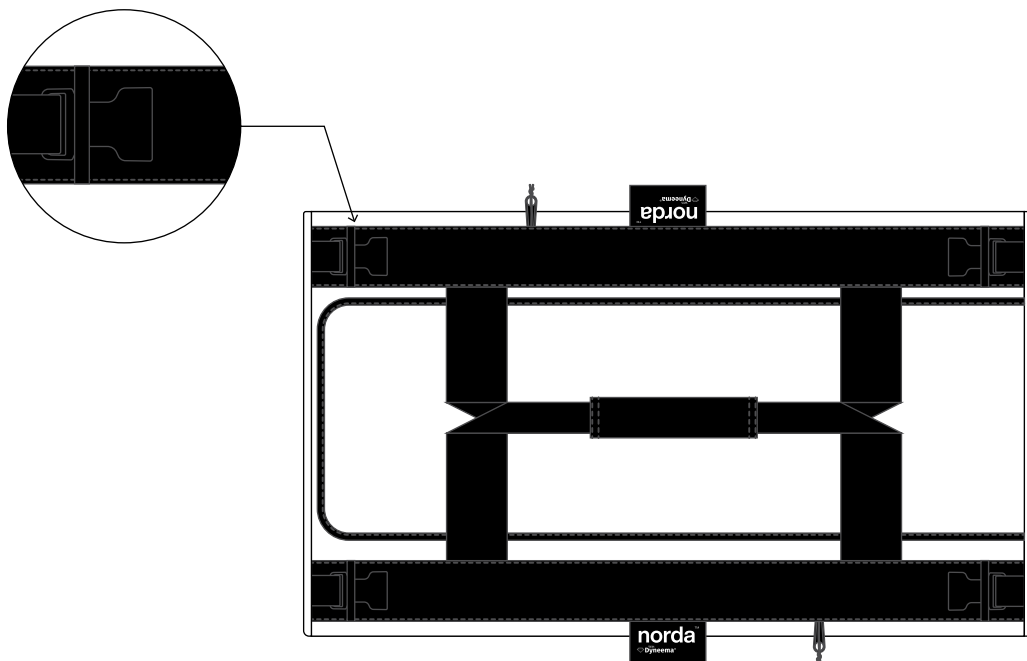

In the interior, at each end of the bag is a net with an elasticized opening hem, allowing for the organization and separation of certain items from the main cargo area of the Toolbox.

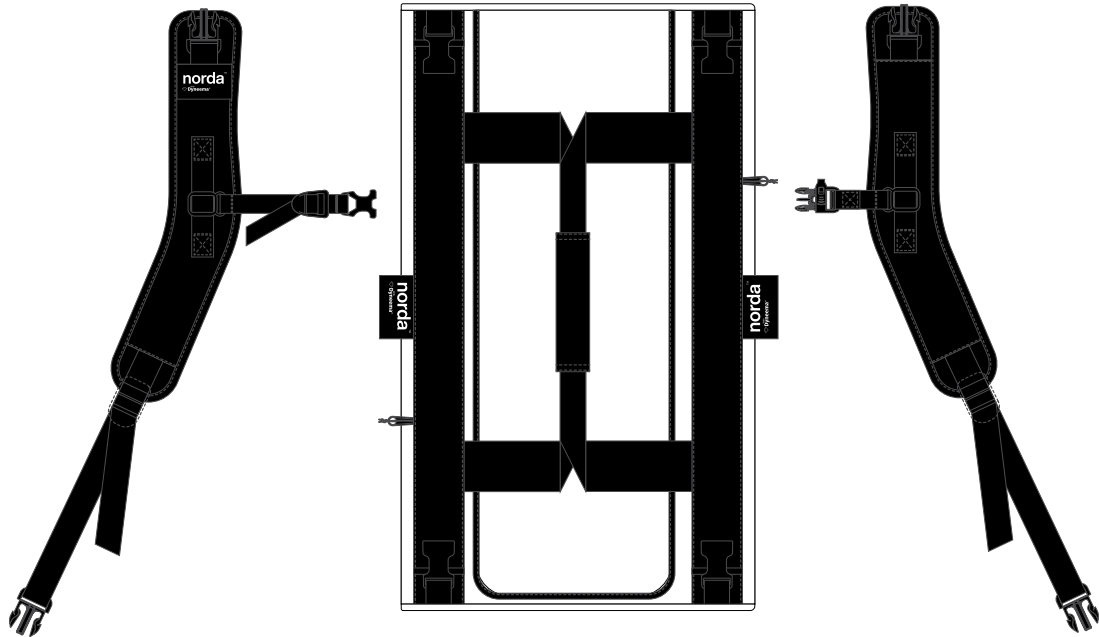

Both sides of the **norda™ Toolbox** feature concealed zipper pockets. They are opened and closed by pulling the bag label up to more easily access and maneuver the zipper.

The **norda™ Toolbox** can be carried as a traditional duffel bag. When utilized in this way, the two main straps can be velcroed together.

When carried like a traditional duffel bag, you can loop the **4 female buckles** under their respective elastic so they don't tangle.

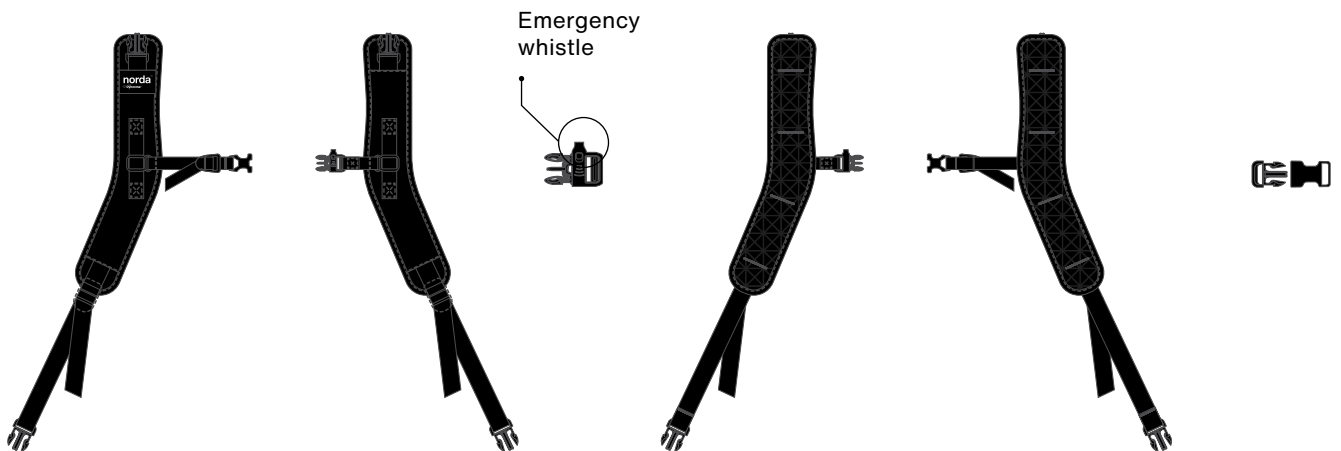

The **norda™ Toolbox** can be utilized either as a duffel bag or as a backpack.

Detachable backpack straps make the transition between duffel and backpack easy and seamless.

Front View

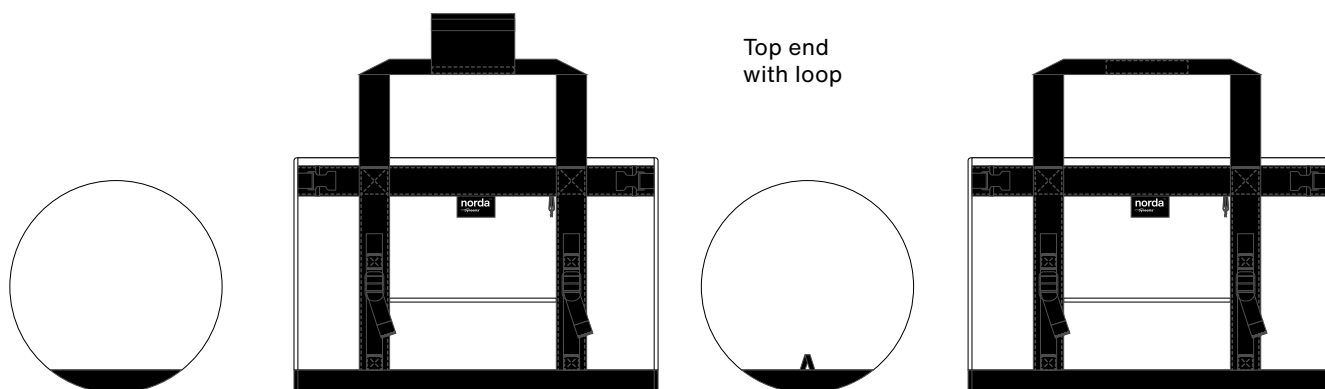

Rear View

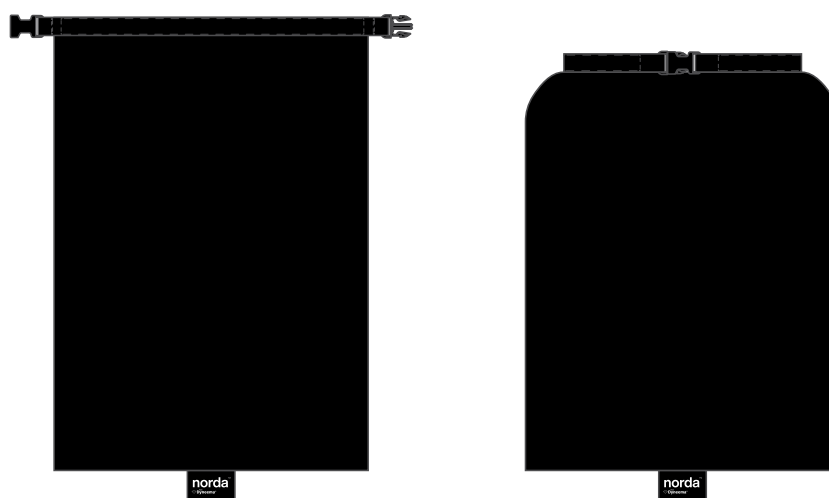

The **norda™ Toolbox** can be utilized as a backpack and features detachable backpack straps.

The length of the backpack straps can be adjusted via the pull straps at the bottom of them.

The backpack straps feature a buckled chest strap. The height of this chest strap can be adjusted via its attachment point on the backpack straps. There is an emergency whistle on chest strap buckle.

When utilized in backpack mode, the **norda™ Toolbox** features a loop at the top end that allows the bag to be hung on any hook.

The **norda™ Toolbox** comes with a Stealth Black Bio-Dyneema® stow bag.
